INTERPRETATION

What the Numbers Say

What the August 2026 figures point to, tied directly to the tables on page 3.

-11.3%

SINGLE-FAMILY

-22.8%

CONDO/TOWNHOME

CLOSED SALES, YOY

Fewer closings, and fewer listings to choose from.

Closed sales fell to 181 single-family homes and 61 condos/townhomes. Active inventory also dropped, 21.7% to 644 and 19.9% to 492, so both buyers and sellers are working with a thinner market than a year ago.

3.4 mo
SINGLE-FAMILY MONTHS
OF SUPPLY

Single-family homes are seller-leaning.

Supply tightened from 5.1 to 3.4 months, and median days to contract fell sharply, down 27.3% from 77 to 56. The typical sale closed at 94.2% of original list price, up from 91.5%.

5.5 mo
CONDO/TOWNHOME
MONTHS OF SUPPLY

Condos and townhomes are close to balanced.

Supply fell from 8.1 to 5.5 months. With the typical sale closing at 90.8% of original list price and a median of 84 days to contract, buyers still have a measured opportunity to negotiate.

61
CONDO/TOWNHOME
CLOSINGS

Read the +20.7% condo median with care.

The condo/townhome median rose to \$277,500 from \$230,000, but it rests on only 61 closings. A small sample can shift with the mix of units that happened to sell, so it is not a blanket conclusion about what any condo or townhome is worth.

36.5%

SINGLE-FAMILY

52.5%

CONDO/TOWNHOME

CASH SHARE
(CALCULATED)

Cash buyers remain a large part of the market.

36.5% of single-family closings (66 of 181) and 52.5% of condo/townhome closings (32 of 61) were paid in cash, calculated from the reported counts.

County figures blend distinct local markets, including Stuart, Palm City, Jensen Beach, Hobe Sound and Port Salerno, and conditions in any one of them can differ from the county median.

PRACTICAL GUIDANCE

For Buyers & For Sellers

The same county data calls for different moves depending on which side of the transaction you are on, and which property type you are dealing with.

For Buyers

Single-Family Homes

3.4 mo supply · 56 days · 94.2% of list

- **Be ready to act.**

At 3.4 months of supply and 56 median days to contract, have a pre-approval or proof of funds in hand before you tour.

- **Anchor offers to closed sales.**

Sales closed at 94.2% of original list price. With 36.5% of closings in cash (calculated), clean terms help financed offers compete.

Condos & Townhomes

5.5 mo supply · 84 days · 90.8% of list

- **Negotiate, with a plan.**

At 5.5 months of supply and 90.8% of original list price, there is measured room on price, credits or repairs. Well-priced units can still move.

- **Do the building homework.**

Use the 84-day median to review the budget, reserves, assessments and inspections. If financing, confirm lender eligibility for the building early.

For Sellers

Single-Family Homes

3.4 mo supply · 56 days · 94.2% of list

- **Supply favors you. Price still decides.**

With 3.4 months of supply and days to contract down to 56, homes priced to recent closed sales are drawing buyers.

- **Don't overshoot the first price.**

Sellers received 94.2% of original list price. Starting too high risks reductions after the first weeks on market.

Condos & Townhomes

5.5 mo supply · 84 days · 90.8% of list

- **Expect negotiation.**

At 5.5 months of supply and 90.8% of original list price, build some give into pricing and a 84-day median timeline.

- **Don't price off the headline.**

The +20.7% median reflects only 61 closings. Price from comparable sales in your building or community, with association documents ready.
